Projects

GearBest Clone |

Gearbest is an e-commerce website that provides the most cost-efficient delivery service covering 200+ countries and regions, most of which enjoy free door-to-door delivery. 46 Warehouses Worldwide. It has a wide variety of products in consumer electronics, gadgets and men's fashion.

Tech-Stack :
HTML | CSS | JAVASCRIPT

My Contribution:
It was the group project of 6 members and I contributed the following things-
  1.Made the home page with the import-export feature used in the navbar section.
  2.Used set time-interval for automatically changing the image.

Other Features:
- Complete user flow from adding item to cart to success page.
- Login/ Signup page with username visible on all the pages in navbar when user will Login.
- Multiple filter and sorting options.
- All the pages are integrated successfully.
- Having a defined Payment Page, Cart Page, Favorite Page, Login & Signup Page.

BellavitaOrganic Clone |

Bella Vita Organic or 'The Good Life' is a leading natural beauty and skincare brand committed to building handcrafted, natural solutions invigorated by the natural elements of the earth and ancient skin and hair care practices.

Tech-Stack:
HTML | CSS | JAVASCRIPT

My Contribution:
I was assigned the team-leader by the Masai School and it was the wonderful experience while leading the team of 5 members. I contributed the following things-
  1,Made the navbar section of the home page.
  2.Used the import-export feature in the navbar section and the footer part.
  3.Made the sliding images in the different product section on clicking the slider icon.
  4.Made the whole home-page and integrated all the pages successfully.

Other Features:
- Well listed product pages.
- Login only after SignUp Authenticated.
- Defined Cart Page, Payment Page.
- Applying promo-code feature while payment.
- User-Details filling page before payement.
